APEX LARK | Business Insights Report

Retail Sales Dashboard – Day 04 · Data: Cleaned_Data, 4,200 orders, Jan 2020 – Dec 2024 (currency assumed ₹)

TOTAL SALES	TOTAL PROFIT	TOTAL ORDERS	TOTAL CUSTOMERS	PROFIT MARGIN
₹232.7M	₹43.1M	4,200	4,112	18.5%

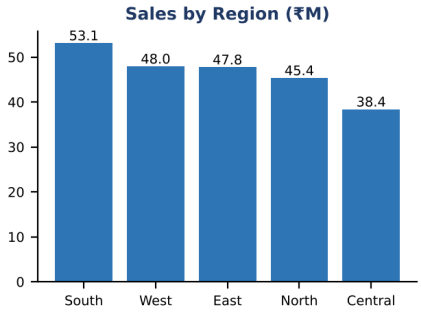

1. Dashboard Architecture

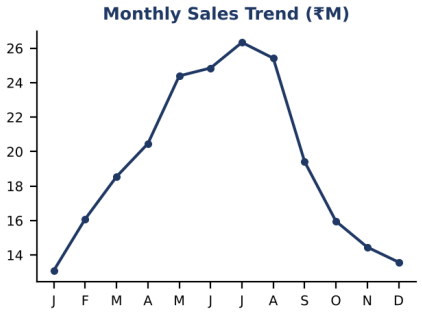

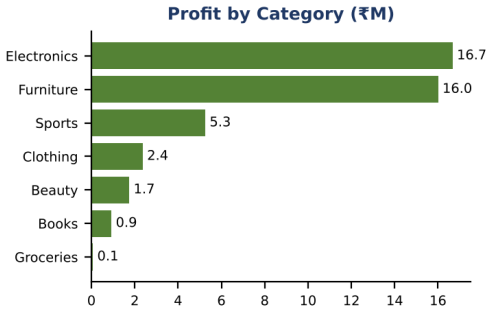

Sheets: Dashboard · Analysis (6 pivot-style tables) · Data (Excel Table) · Customers · Notes.
Layout: title → 4 dropdown filters (Region, Category, Year, Month) → 4 KPI cards → 4 charts (2×2) → Top 10 Customers and Top 10 Products tables.
Interactivity: changing any filter recalculates every KPI, chart and table.
Palette: navy / blue / green on light grey.

2. Key Findings

- **Top region:** South – ₹53.1M (22.8% of sales); lowest is Central at ₹38.4M.
- **Top category:** Electronics – ₹138.4M (59% of sales); with Furniture it makes up 84% of revenue.
- **Peak month:** July is the strongest calendar month (₹26.3M); the single highest month was Aug 2024 (₹7.4M).
- **Top customer:** Meera Kapoor (CUST08739) – ₹1.2M; the top 10 customers contribute 4.2% of sales, so revenue is not customer-concentrated.
- **Trends:** strong seasonality – May–Aug brings 43% of annual sales vs 25% in Oct–Jan; sales grew about 7.2% a year (CAGR) (2020 → 2024: ₹38.4M → ₹50.7M).
- **Margin gap:** Electronics earns 12% margin and Groceries 8%, against 45% for Beauty and 40% for Books.
- **Leakage:** Returned and Cancelled orders hold 20.4% of sales value (13.9% returned, 6.5% cancelled).

3. Recommendations

1. Protect Electronics profitability

Electronics drives 59% of sales but at 12% margin. Review discounting and supplier pricing, bundle accessories, and reallocate some promotion spend to Beauty, Clothing and Books where margin is 35%–45%.

2. Plan around the seasonal peak

Stock up and launch campaigns from April ahead of the May–August peak, and use Oct–Jan offers (festive bundles, loyalty rewards) to lift the low season. Focus on Central, the weakest region, with regional campaigns.

3. Cut returns and cancellations

20% of sales value is returned or cancelled. Improve product descriptions and sizing guidance, check fulfilment delays, and confirm high-value orders before dispatch to recover revenue.
